this third edition of sheldon and yoxon s authoritative environmental management systems previously entitled installing environmental management systems has been extensively revised to cover changes in international standards and other related developments in the field such as british standard bs 8555 drawing on the authors extensive hands on experience in both implementing and training others it describes how such systems can be used to prioritize actions and resources increase efficiency minimize costs and lead to better more informed decision making set out in a straightforward series of steps it cuts through the jargon and demolishes the myths that surround this important management tool the authors explain the importance of carrying out an initial environmental review identifying cause and effect understanding legislative and regulatory issues developing a policy and defining objectives and targets they also describe how to design an effective environmental management programme and implement a successful audit and review clear and concise and packed with helpful practical examples and insider tips it has become the standard manual for managers and consultants at all levels

environmental management covers all principles practice and policy issues concerned with environmental management providing a comprehensive resource and reference point for students and practitioners in the field

second revised enlarged edition environmental management is a neat and comprehensive presentation of a multi disciplinary subject treated from both national and global perspectives starting with the basics of every branch of science as it relates to the environment the author goes to expound on human interference with the environment and the impact of man and technology on the environment he follows with an explanation of the concept of environmental management and ends with examples of practical environmental management of particular sectors like urban land management watershed management agricultural management hill area management and coastal zone management a product of the author s extensive ten year research related to enhance the primary productivity of the aquatic ecosystem bioremediation waste water purification through ecological principles aquatic ecology ecotoxicology molecular toxicology and environmental management this authoritative book is bound to find favour with students teachers and practitioners of environmental management

it is hard to imagine an area of study or a discipline in which a basic knowledge of the issues would not be beneficial since environmental concerns are very much in the public consciousness written at a level that is accessible to students in all disciplines introduction to environmental management translates complex environmental issues i

this series is dedicated to serving the growing community of scholars and practitioners concerned with the principles and applications

of environmental management each volume is a thorough treatment of a specific topic of importance for proper management practices a fundamental objective of these books is to help the reader discern and implement man's stewardship of our environment and the world's renewable resources for we must strive to understand the relationship between man and nature act to bring harmony to it and nurture an environment that is both stable and productive these objectives have often eluded us because the pursuit of other individual and societal goals has diverted us from a course of living in balance with the environment at times therefore the environmental manager may have to exert restrictive control which is usually best applied to man not nature attempts to alter or harness nature have often failed or backfired as exemplified by the results of imprudent use of herbicides fertilizers water and other agents each book in this series will shed light on the fundamental and applied aspects of environmental management it is hoped that each will help solve a practical and serious environmental problem

first published in 1997 an introductory text on environmental management with a global coverage including attention paid to the third world the perspective of the book is geographical and the treatment draws on the broad and complementary experience of the two authors

covers the most recent topics in the field of environmental management and provides a broad focus on the theoretical and methodological underpinnings of environmental management provides an up to date survey of the field from the perspective of different disciplines covers the topic of environmental management from multiple perspectives namely natural sciences engineering

business social sciences and methods and tools perspectives combines both academic rigor and practical approach through literature reviews and theories and examples and case studies from diverse geographic areas and policy domains explores local and global issues of environmental management and analyzes the role of various contributors in the environmental management process chapter contents are appropriately demonstrated with numerous pictures charts graphs and tables and accompanied by a detailed reference list for further readings

there is a growing need to support undergraduate educators in the development of environmental management educational materials recognizing this need the national science foundation funded a college faculty workshop on environmental management that was conducted at utah state university in july and august 1996 the principle objectives of the seminar were 1 to provide a meaningful course which would generate new ideas and innovative educational approaches in the emerging field of environmental management and 2 to develop an applications oriented problem workbook which would support undergraduate faculty involvement in the production of course materials the result of this effort is environmental management problems and solutions an informative text on the essentials of environmental management more than 200 structured problems presented in the book are meant to elicit a sound understanding of the basics of environmental monitoring assessment and control detailed solutions to each problem provided with each chapter will prove useful to both the student and the instructor this innovative text is a valuable resource for anyone involved in training of engineers and scientists in the field of environmental engineering

unique in its integration of cases and readings this text seeks to increase environmental awareness sensitivity and literacy in students this collection of readings and cases can be used as a supplement or a primary text and is perfect for business government and society ethics strategic management and industrial ecology courses

in view of the increasing quest for environmental management in businesses this book provides a good reference to firms to understand how they may manage their supply chains to improve business and environmental performance the book consists of six chapters covering such topics as environmental management environmental management practices with supply chain efforts collaborative environmental management organizational capabilities in environmental management environmental disclosure and closed loop supply chains the book presents theory driven discussions on the link between environmental management and business performance in the context of supply chain management the book will be useful for firms to learn from the research findings and real life cases to develop plans to implement environmental management practices jointly with supply chain partners

environmental management with few exceptions is not taught in colleges universities technical and management institutions the result is that the students of these institutions lack knowledge and sensitisation to environmental issues they lack the awareness of environmental consequences of human actions to fill this void environmental management is timely the book provides background material to various environmental problems it surveys a range of topics from sustainable development and ecological imperatives to strategies for managing environmental issues the problem of pollution waste management biological diversity and forest management

have been analysed in the light of laws and international conventions and treaties the book brings out the realities about the damage being inflicted on the environment and our exploitative attitude to nature it concludes with discussion and debate about values in nature and touches upon the subject of metamorphosis of the whole trajectory of attitudes in modern societies

this work encourages business managers to take account of the needs of the threatened planet and dwindling natural resources while simultaneously redefining the commercial interests involved the book highlights opportunities for and threats to sustainable development it leads the reader through the morass of existing and proposed regulations and guidelines which cover the areas encompassed by the term environmental management the use of hazardous chemicals toxic wastes and emissions occupational health and safety and environmental impact analysis completely revised and updated this

thompson environmental science u of calgary gathers 14 contributors from the academic and business sectors in this text for students professionals policy makers and regulators this book is not about managing the environment but about managing people in organizations governments and corporations to lessen environmental damage topics include auditing education and training environmental reporting impact assessment and the natural step a swedish ngo that advises on efficient material usage to increase profits and spare the environment pub desc
